Gives outboards and stern drives a performance boost, improving both stability and handling. The Hydro-Stabilizer outperforms ordinary flat hydrofoils by reducing drag when the hull goes on plane. Installs on a large variety of motor styles and sizes with included stainless steel bolts and lock nuts. Wings constructed of black molded plastic. The Hydro-Stabilizer quickly puts the boat on plane, and helps pull skiers out of the hole faster. Even at lower RPMs, it keeps the boat on plane. The wings provide a smoother, more stable ride and reduce ventilation in turns

	Attwood is pleased to introduce the new custom-fit covers for Mercury engines. The official Mercury logo is displayed in brilliant white against a sleek black background. These covers protect and fit far better than typical universal hoods..... plus they show your Mercury pride on the road. Constructed of 2-Ply Laminated Polyester <ul style="list-style-type: none"> <li>•The outer shell is tough, abrasion-resistant polyester.</li> <li>•Acrylic coating keeps the cover waterproof and UV-resistant.</li> <li>•The inside lining is a soft, non woven polyester backing that provides a cushioned barrier around the engine cowling.</li> <li>•A 1-inch polyweb strap in the bottom hem cinches the cover tight. Includes quick-release buckle for fast tightening and removal.</li> </ul>
